BSI Launches OGP Network

OGP Network is an online portal that accelerates local supplier development to support oil, gas, and power generation projects in rapidly growing countries such as Bahrain, Brazil, China, India, Indonesia, Nigeria, Qatar, Russia and Saudi Arabia, where the choice of local suppliers may be limited and field service can be a challenge. OGP Network provides buyers with independent rating and analyst commentary about suppliers, by product and country leading to 10 times faster access to overseas partners than can be achieved through traditional sourcing and sales channels, and internet-based resources.
