4th Annual Strategic Sourcing Study

Boston, MA August 2007

Energy Prices Reshaping the Supply Chain: Charting a New Course?

www.bostonstrategies.com (1) 781-250-8150

BOSTON STRATEGIES INTERNATIONAL Global growth. Guaranteed.

This report has been prepared by Boston Strategies International at the request of CLIENT for the purpose of establishing its operating strategies. It may not be appropriate for other purposes or audiences. This report contains forward-looking statements and projections with respect to anticipated future performance of CLIENT, suppliers, customers, and/or general or specific economic conditions and factors that are based on Boston Strategies International's analysis of market trends and external data. Forward-looking statements and projections are not guarantees of future performance and involve significant business, economic and competitive risks, contingencies and uncertainties, which are difficult to predict. Accordingly, these projections and forward-looking statements may not be realized and actual results may vary up or down. This report may not be reproduced or distributed without express written approval from Boston Strategies International.

Agenda

- High and Volatile
- Fragmented and Diffuse
- Supply Chain Impact
- Eight Buying Strategies
- Five Policy Issues
- The Bottom Line

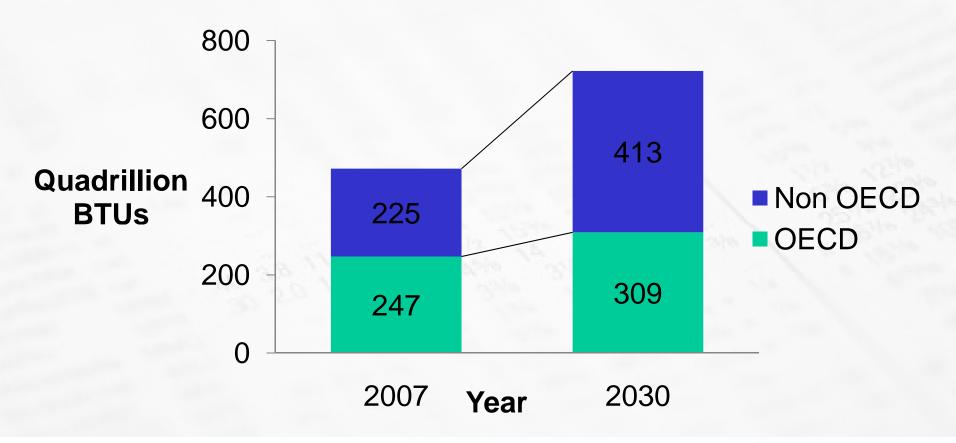

High and Volatile

World energy requirements increasing

 Energy consumption forecast to increase 52% by 2030

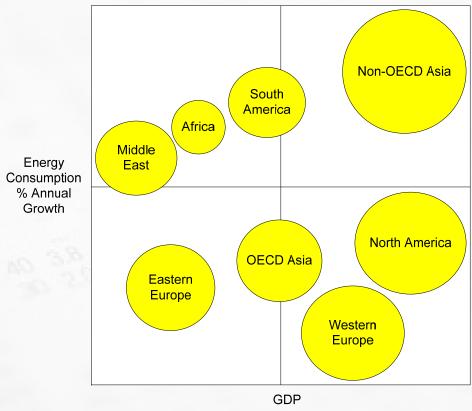

Growth in Global Energy Consumption, 2007 vs. 2030

Asia leading the growth

- China accounts for most of the demand growth
- Developed economies growing at 1% or less

Growth in Energy Consumption by World Area

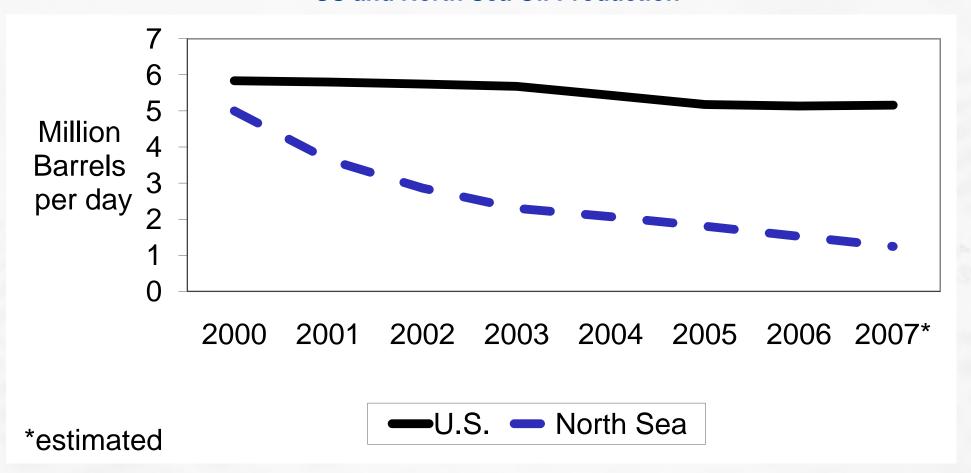

Note: Size of bubble proportional to actual energy consumption

Production falling behind

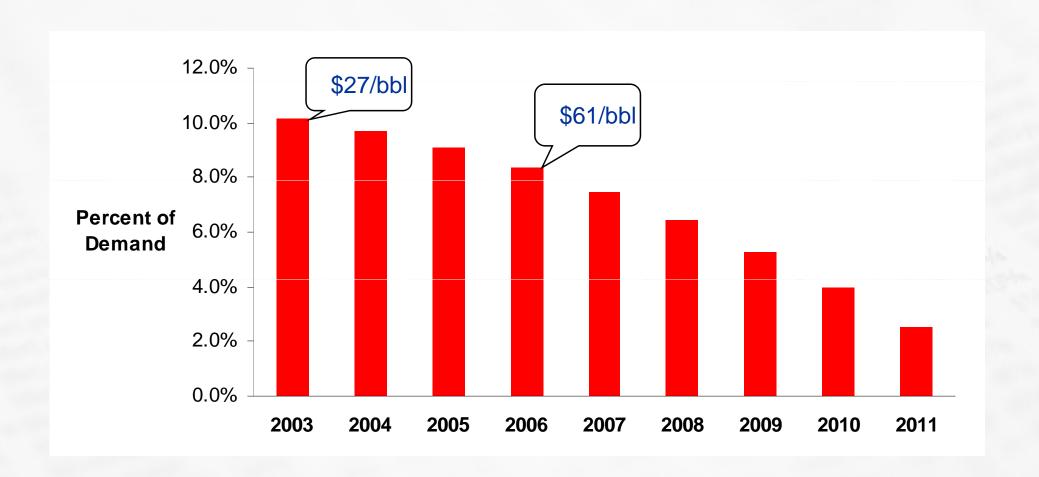

Many locations declining in production

US and North Sea Oil Production

Global oil supply vs. demand

Gap Between Oil Demand and Oil Available

Higher oil prices here to stay?

Weighted Average World Oil Spot Prices 1989-2007

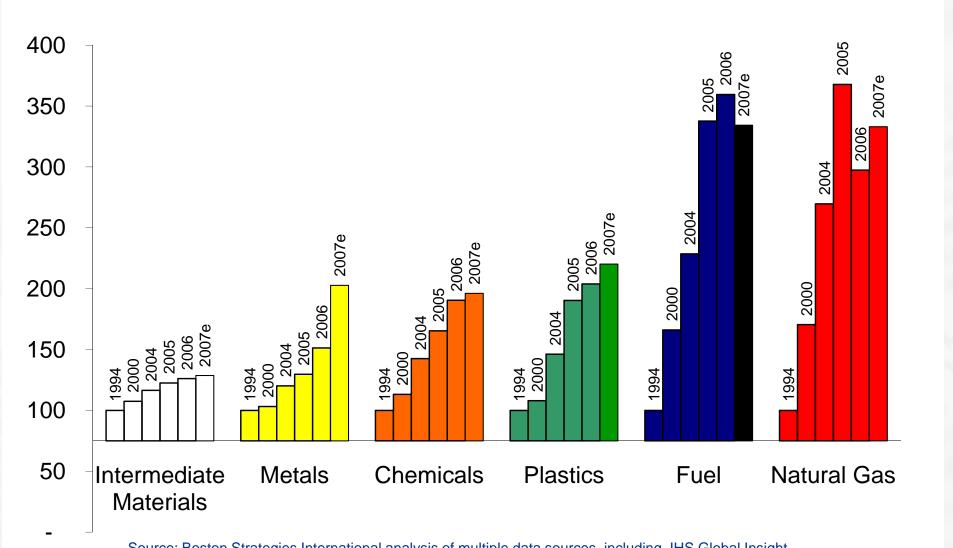

Risk & uncertainty: the new enemy

Percent Change in Natural Gas Price, November 2005 – April 2007

Material prices gone wild

Selected Producer Price Indices (1994=100)

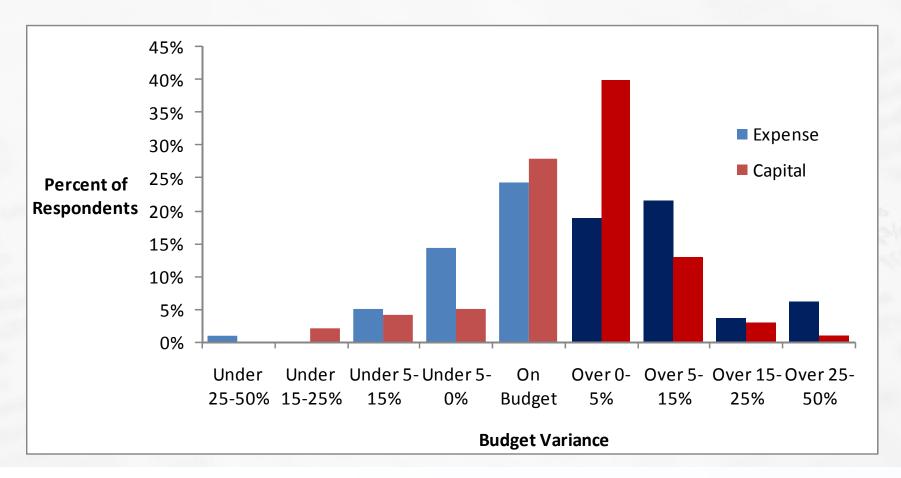

Source: Boston Strategies International analysis of multiple data sources, including IHS Global Insight

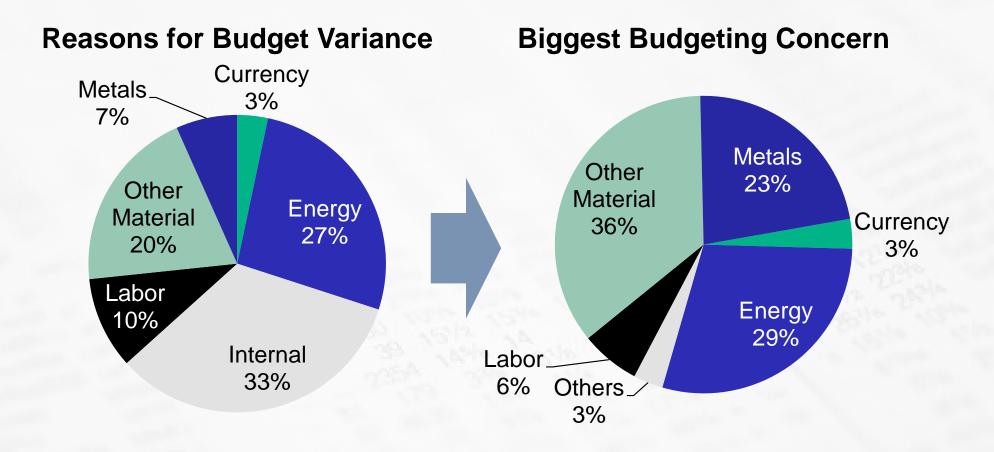

The End of Lean?

Budgets are off; variance is increasing

- Expense: 50% are over-budget, 62% worsening
- Capital: 60% are over-budget, 73% worsening

Energy on the brain

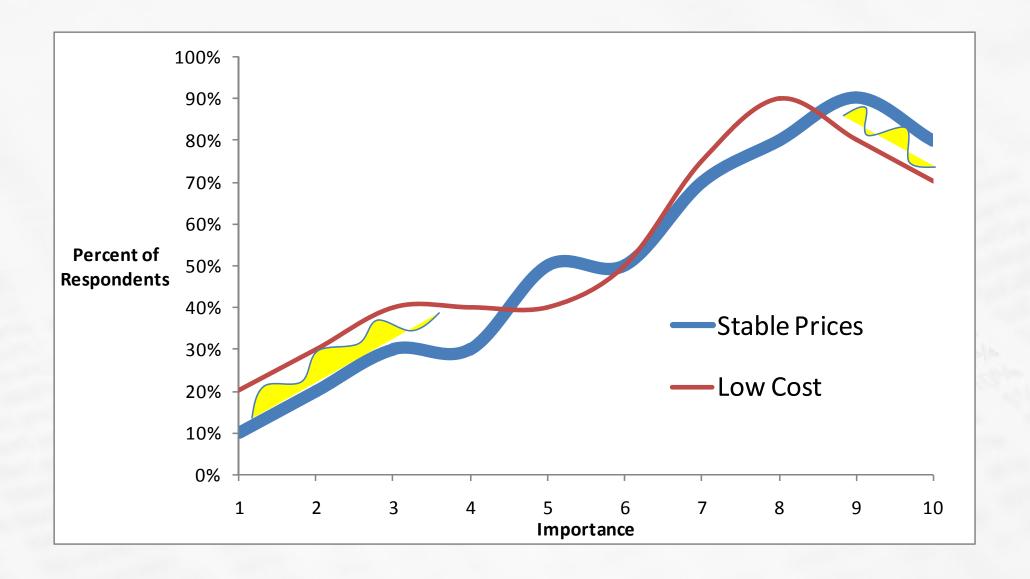

Energy economics reversing lean?

- Decentralizing operations?
- Holding more buffer stock?
- Affecting off-shoring decisions?
- Indirect economic drag?

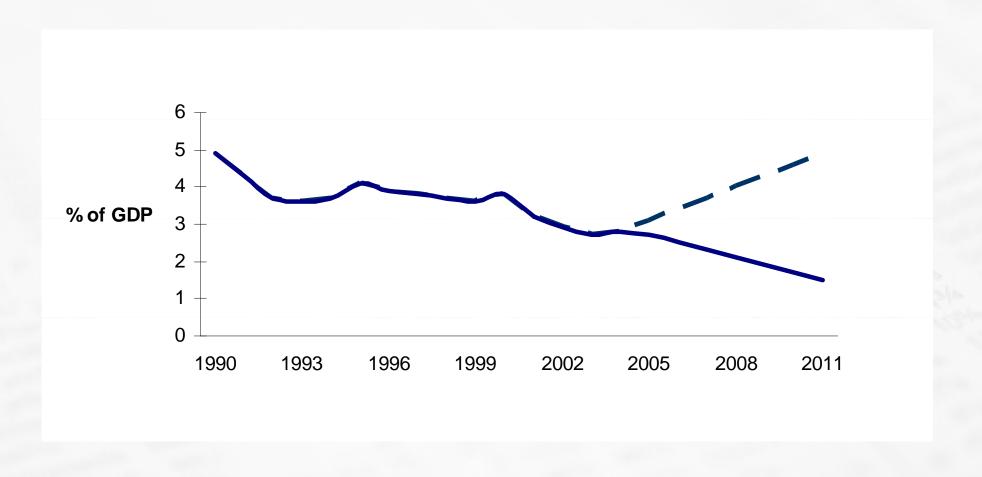

Stability as important as low cost

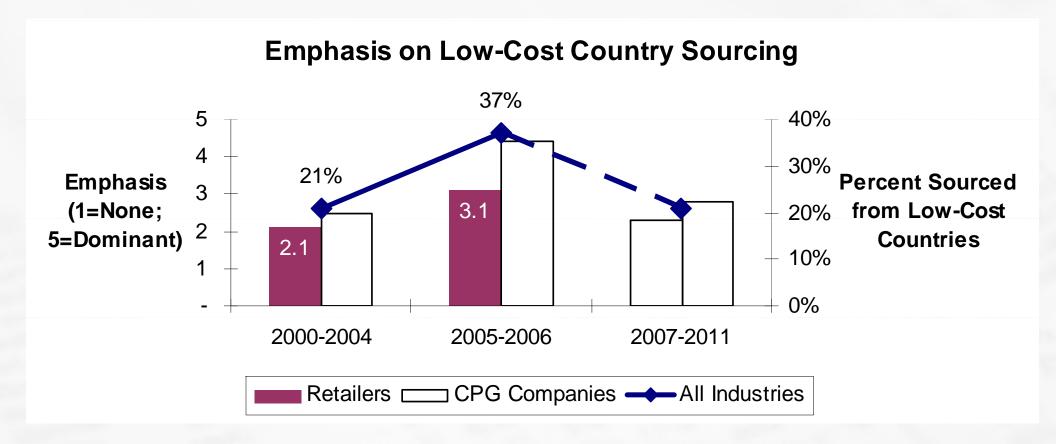

Inventory: inflection point?

Inventory as a Percent of GDP

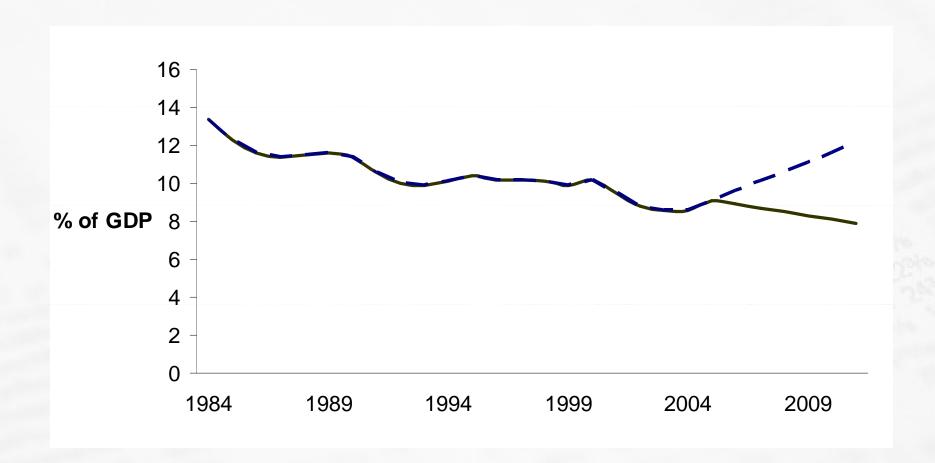

Low-cost country sourcing reversion?

Logistics cost increasing consumer prices?

Logistics Cost as a Percent of GDP

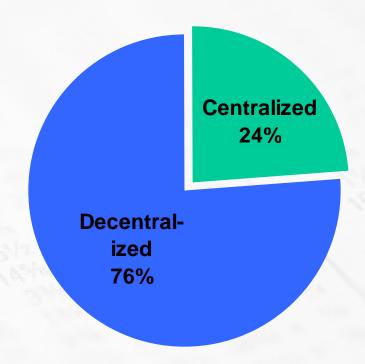

8 Buying Strategies

A fragmented buy

- Purchasing
- Transportation
- Materials
- Logistics
- Distribution
- Warehousing

Percent of Companies
Centralizing the Energy
Buy

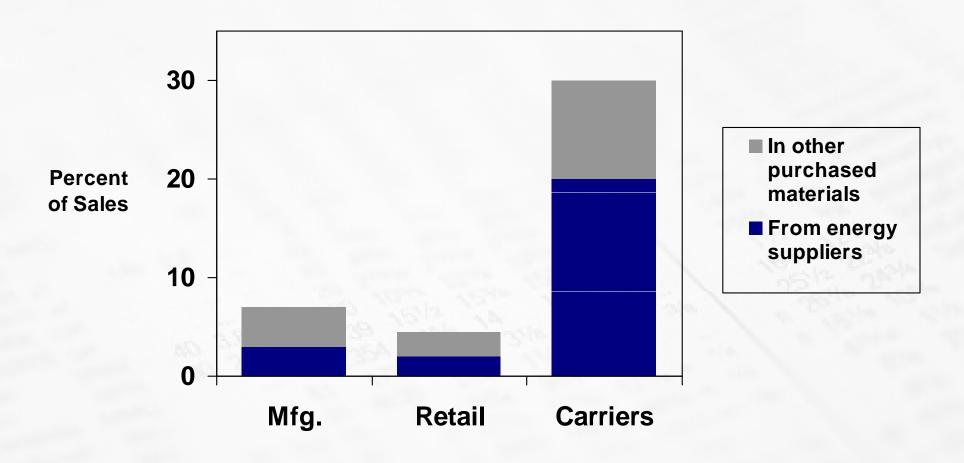

Fragmented

- "[We have]18 regional business units in the US and each one is responsible for its own energy expenditures" – Bryan Warshofsky, Director of Purchasing Applications.
- "We found that we were spending 20% more at one manufacturing plant than at an identical one in another state." – Jacques Lalauze, Gemalto
- "[There is] a lot of gray area. It is often fragmented among Facilities, Transportation, Indirect, Manufacturing, Logistics, and Operations." – Corporate Purchasing Manager, US consumer electronics retailer
- "Each plant manages it decentrally" Henry Turner, Honda
- "Several folks manage power contracts" Rich Walters, Air Products

A large but invisible expenditure

Energy as a Percent of Sales

Potential strategies

Supply Chain Strategies

- 1. Centralize purchasing
- 2. Join a buying consortium
- 3. Sign contracts at forecast rates
- 4. Reduce consumption (value engineering)

Financial Strategies

- 5. Buy in advance at the current price
- 6. Buy options

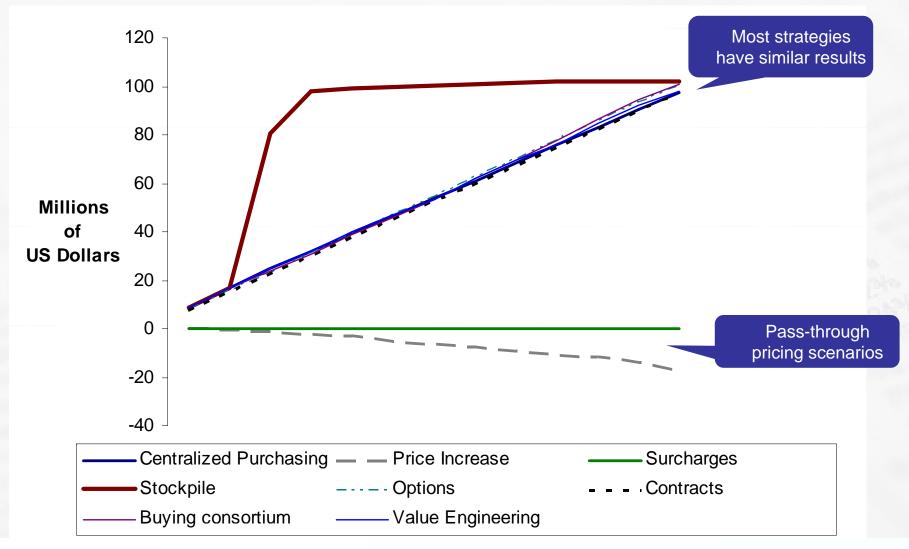

Pricing Strategies

- 7. Pass costs on via a floating surcharge
- 8. Pass costs on and embed in the product price

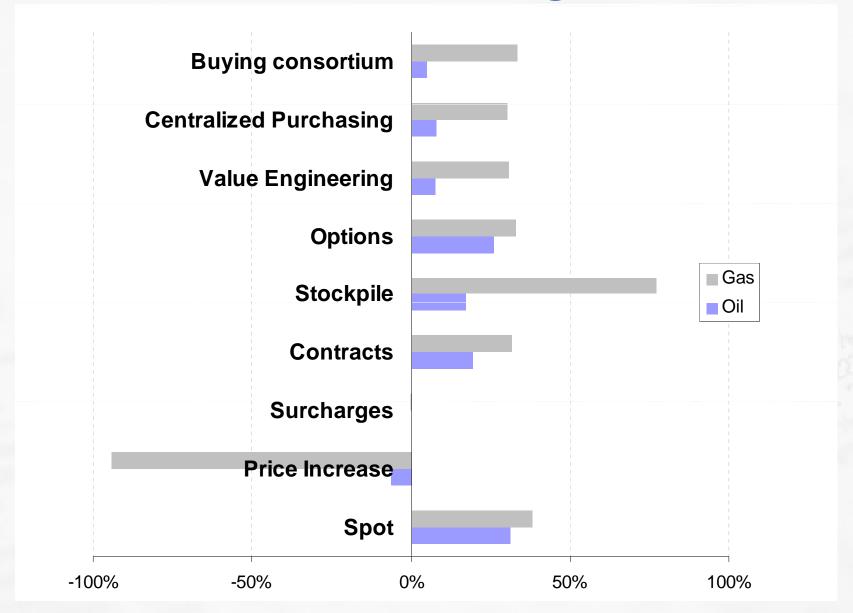

Overall strategy performance

Cumulative Cost of Each Strategy, October 2005-October 2006

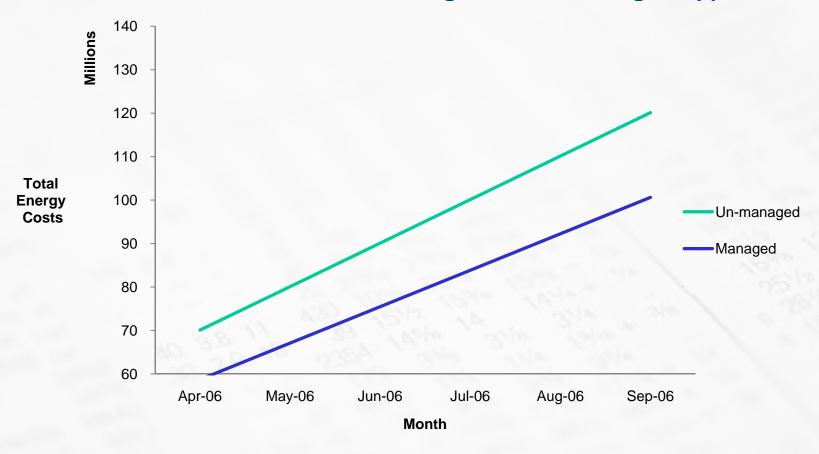

The best strategies

Hybrid strategy saves significantly

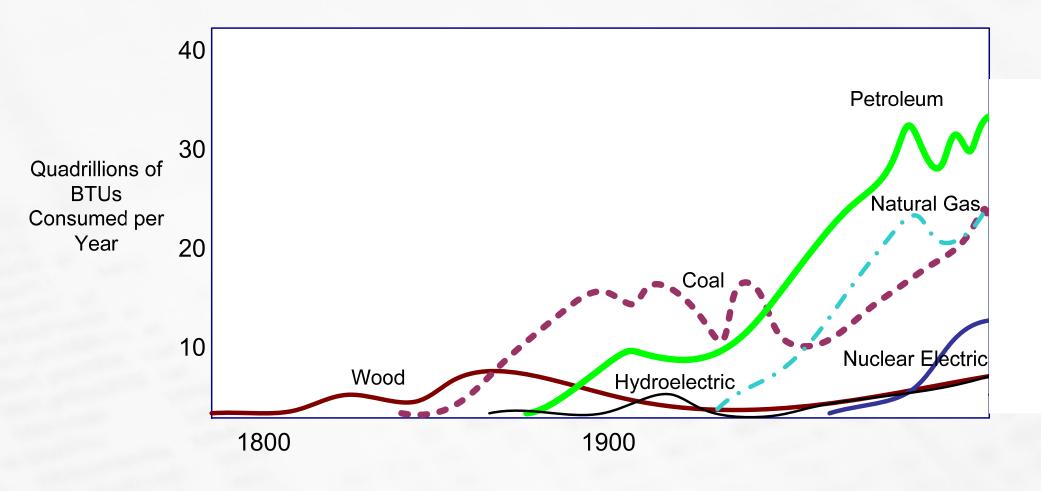

Cumulative Difference Between Managed and Unmanaged Approaches

The Bottom Line

Keeping perspective: the long view

Evolution of U.S. Energy

Manufacturers: stay lean and manage the spend

- Don't reverse lean
 - Energy costs dwarf vs. benefits of being lean
- Establish a program to manage energy spend
 - Any strategy 10-100% better than none
- Re-assess mode, frequency quarterly
 - Unpredictable fuel prices and surcharges need alerts
- When off-shoring, consider whether a doubling of oil prices would change the decision
 - Dual sourcing may become necessary at higher oil prices

Realign budgets more than once a year

83% have a yearly planning horizon

Advice for carriers

- Don't rush to develop alternative fuel vehicles.
 - Most AFV technologies are in their infancies and many companies cannot justify investing in them at present.
- Actively manage fuel spend.
 - Carriers, especially airlines and ocean shipping lines, that proactively manage fuel expenditures, save 10-15% on fuel.
- Reduce dependence on petroleum.
 - Airports and airlines can cost-effectively modify or replace ground handling equipment to operate on LPG, ethanol, or electricity.
- Assess routes and services for profitability.
 - Carriers should analyze the profitability of routes and services
 to determine when, where, and how much to refuel based on
 regional fuel cost advantages.

 BOSTON STRATEGIES INTERNATIONAL

Global growth. Guaranteed.

Advice for policy makers

- Consider supply chain costs and benefits when setting policy for infrastructure and alternate fuel technology.
 - Policy affects, and could reduce, the efficiency, speed, and convenience of supply chains, engendering an unforeseen economic cost.
- Don't jeopardize infrastructure programs to fund alternative fuels.
 - Currently, US tax breaks for ethanol are funded at the expense of the Federal Highway Trust Fund, while highway infrastructure gaps cause increasing congestion.

Control Your Destiny!

Boston Strategies International is a global management consulting firm that helps market leaders achieve competitive advantage through supply chain management through:

- Supply Chain Consulting that helps supply chain leaders make high-stakes decisions
- Cost and Pricing Intelligence that facilitates negotiations, planning, and budgeting
- Market Outlooks that helps identify emerging issues that affect their supply chains, and quantify the impact that they will have
